

## **La Nuit de la Géographie**

### **Coordination 2018 – Europe**

#### **Date**

April 6th, 2018 (Friday)

If really impossible, other dates can be chosen, as close as possible.

Events during the evening and beginning of the night – or all night !

#### **Designation**

Possible variations : in any local language, with the adjective « European » or not...

#### **Communication**

Visuals and posters : if possible, there should be a common frame / image to be declined locally with local information about events

Numerical communication : local languages, local communication, but a common Internet site and a common Twitter hashtag

Logos : « CNFG » and « Nuit de la Géographie » logos to be put forward if possible but not mandatory – the idea is to put forward collaborations, not financial sponsors.

Local organizers may convert the logo « Nuit de la géographie » in other languages.

#### **Common event**

There is no need to be too ambitious about common events, but maybe one common project could link all European events.

One suggestion : the *Sunset project*. When the sun sets in each of the places involved in the Night of Geography, organizers or participants take geographical photographs of the sunset and publish them on the twitter account of the Night of Geography, maybe also on a interactive live internet board/picture... maybe with a small description or highlighting some kind of issue... We can even think of a competition with a prize (publication of the winning photo on all of our websites ?)

#### **International coordination committee of national representatives:**

Jose Alberto Rio Fernandes (Portugal)

Niamh Moore-Cherry (Ireland)

Marina Frolova, Meritxell Gisbert (Spain)

Marek Wieckowski (Poland)

Maria Paradiso (Italy)

Rémy Léger, Anne-Peggy Hellequin, Antoine le Blanc (France)

Maria Pigaki (Greece)

Benjamin Wayens (Belgium)

Henk Ottens (Netherlands)

Ana Pejdo (Croatia)

Zoltan Kovacs (Hungary)

**National representatives should:**

- Circulate information in their country, advertise the event, mobilize people so that they come up with local initiatives and events. We suggest you mobilize individually a few people (teachers, students...) who will mobilize others: a snowball effect!
- Circulate back the local information to the international level (the coordination committee)
